How to Customize the Mockup Template

Step 1

- Open the PSD file(s) in Adobe Photoshop.

- Double click the smart-object layer(s) marked in RED on the very top named "ADD LOGO HERE" and add your design and click Save. Your designs will automatically be shown on the bottle mockup.

Step 2

- You can replace your own background color using the "Color Fill" layer at the bottom of the layers. Or add your own background image.

- You can also change the "Color of the Bottle" using the "Add Color" layer marked in Red available within the "Bottle" folder.

Step 3

- You can add "WHITE LOGO" or "DARK LOGO" based on the bottle color and background color. Just hide or switch on the required logo folders.

- Once you are done, export the scene and enjoy!
